See the definitions of packaging materials.

In this column you should enter the weights of **new packaging, placed on the domestic market** for products that the **firm has itself** packed in-house or has had packed in Finland and owned at the time of packing.

You should enter the weights of packaging for imported products which are placed on the domestic market. The data applies to the importer of products and not, for example, an agent. Åland is an import country.

Enter the weights of packaging in this column for export and tax-free products packed in-house or outsource packed. Åland is an export country.

This column is for refilling of packaging or reuse as packaging. Typical packaging in this category comprises beverage bottles, steel drums, roller cages, pallets, plastic trays, plastic crates, cardboard boxes for recovery and so on. Each instance of refilling or reuse should be included in the figures.  
**NOTE!** Packaging placed on the market **for the first time** should be entered in the column "Packed in-house and outsource packed for the domestic market" and "Imports".

**NOTE!** Do not enter on the form the weights of packaging for imported products that the firm itself re-exports in their original packaging.
